

PSYC 4104E Theses

YEAR 2010-2011

PSYC 4104EL 01 (Available in A224 on CD)

- Alexander: The effects of impulsivity and priming on snack preference
- Amos: Effects of mindful meditation, perfectionism cognitions, and anxiety sensitivity on levels of state mindfulness and reaction time.
- Burrell: The effect of misleading information and environmental distraction on the accuracy of eyewitness reports.
- Chen: Face recognition and social cognition: The effect of emotion and race on face recognition ability.
- Cirelli: The instructional effect of visual action verbs on processing depth.
- Davidson: The effects of novelty and evaluation on public speaking state anxiety.
- Desnoyers: The effects of optimism, perfectionism, and rumination on working memory.
- Giles, B.: Weapon focus and type of sequential lineups on accuracy and recognition.
- Giles, C.: Online friendship formation: Effects of gender and attachment security on idealizations.
- Haddy: The effect of sex education and place of residence on sexual awareness and openness in first year university students.
- Knebel: Ideal imagery, social context, and perfectionism: Impacts on body dissatisfaction and drive for muscularity.
- Michlowski: Evaluation and anxiety level: Cumulative effect that two variables can have to induce stress and affect task performance.
- Newton: The effects of gender and processing depth on domestic violence attitudes and willingness to intervene.
- Siemon: The effects of test item format and basic arithmetic ability on statistic test anxiety and test accuracy.
- Silvestri: The effects of stress and sodium concentration on the consumption of liquids in Wistar rats.
- Stewart: Similarity and difference in priming media articles: Effects on attitudes toward Muslims.
- Wall: Learning style or memory: A look at playing the guitar.
- Whitcher: The effects of disclosure and experience on attitudes towards persons with autism.
- Zimany: The effects of prenatal dexamethasone exposure on behavioural outcomes in rats.

YEAR 2010-2011

PSYC 4104EL 02 (Available in A224 on CD)

- Bridekirk: The affect of mindfulness intervention on emotionally evoking sad original Disney moments.
- Caswell: Differentiating patterns of neuronal damage and protection in seized rats treated with ketamine, acepromazine, or prazosin.
- Churchill: The effects of exercise and public self-consciousness on mood and self-evaluation following a social stress task.
- Clement: The effects of combined perinatal magnetic field and NO-blocking treatments on brain stem and hypothalamic nuclei: implications for Sudden Infant Death.
- Coons: Raising a child with Fetal Alcohol Spectrum Disorder or Autism Spectrum Disorder in Northern Ontario: A comparison of stressors in families.

- Corradini: The effects of transcerebrally-applied weak magnetic fields on mood.
- Freeman: The relationship between the ideal self, actual self and partner judgments in determining romantic interpersonal attraction using the Big Five Model.
- Goulet: The effect of frustration on the perception of behaviour.
- Henry: Self-focused rumination and its effects on cognitive tasks.
- Juden-Kelly: The influence of intention on a live feedback random number generator (RNG): Has Schrödinger's cat been neutered while no one was looking.
- Keaney: How to detect genuine as opposed to fake smiles using modern quantitative electroencephalography and eye-tracking.
- Lehman: Different models of hypoxic damage on hippocampal and frontal cortical neurons of infant rats and their modulation by extremely low frequency magnetic fields: A histological analysis.
- Mandigo: The influence of gender, attachment, and a video prime on sexual fantasies, behaviours, and desires.
- Murray: Distractibility and differentially formatted reading comprehension tasks.
- Murugan: Histological damage correlates of maze proficiency and conditioned taste aversion in *Rattus Norvegicus* with histories of seizures: Serial versus parallel models of memory.
- Punkkinen: Electromagnetic equivalents of spoken words and music influence mood: A quantitative electroencephalographic approach.
- Rossini: Transcerebral weak magnetic fields and temporal auditory discrimination.
- Siemer: The impact of physical attractiveness on the effort of online daters.
- Vares: Fibonacci sequenced target stimuli response reaction times and quantitative electroencephalographic activity of humans.

YEAR 2009-2010

PSYC 4104EL 01 (Available in A224 on CD)

- Amsterdam: The effect of gender stereotyped items and incidental memory condition on recall.
- Bingley: Predicting early literacy skills in Junior Kindergarten from parental variables.
- Bolt: The effect of action and presentation format on memory recall and recall time.
- Bond: The effects of perfectionism, mindfulness, and mindfulness-based meditation on negative self-thoughts, habitual negative self-thoughts, and overall well-being.
- Clarke: Visual attractiveness and vocal femininity and their effects on liking, attraction, and the desire to affiliate.
- Cochrane: The effects of stress and palatability on caloric intake and behavior in Wistar rats.
- D'Arville: The effects of modes of learning and complexity on memory recall and accuracy.
- Giffen: The relationship between self-reported symptoms of test anxiety and self-reported symptoms of DSM-IV-TR symptoms of anxiety disorders.
- Gray: Attitudes of university students and field workers towards the sexuality of individuals with and without disabilities.
- Guertin: Lecture-based multimedia learning: The effects of intonation and picture relevance on memory and attention.
- Healy: The effects of music and distraction on spatial ability.
- Madore: The effects of sleep in the cerebral lateralization of memory.
- Primeau: The effect of body size and body portrayal on body dissatisfaction and drive for thinness on female university students.
- Robertson: The effects of composite level and symmetry on the reported level of attractiveness towards male and female faces.

- Testa: The effects of misleading questioning and tactile distraction on memory recall and confidence.
- Valiquette: An investigation of parental variable and kindergarten children's reading ability.

YEAR 2009-2010

PSYC 4104EL 02 (Available in A224 on CD)

- Bales: How does the male and female brain respond to advertising? The effect of an antidepressant commercial on brain activity.
- Caldbick: Do pulsed cerebral magnetic field applications influence logical deduction?
- Carraca: Alpha state and empathy.
- Cybolsky: The effects of moods comprised of multiple emotions on memory.
- Harrison: The relationship of juror personality and defendants' mental status to sentencing decisions.
- Larsen: Talk with the hand: Verbal and gestural language translations measured by the QEEG.
- Lewis: The effects of relaxation techniques on frustration and performance.
- McCaig: The effects of counseling interventions of lowering stress levels in university students.
- McCallum: Comparing memory for French and English taboo words.
- Nguyen: Effectiveness of three different instruction methods in teaching a novel self-defence technique in athletes and non-athletes.
- Reed: Electromagnetic modification of verbal memory performance and quantitative electroencephalographic coherence.
- Ryan: Anticipation and irritation: The Tim Horton's line-up effect.
- Sabin: The effects of gender ratio and task type on leader perceptions.
- Steinke: Background music and extraversion effects on cognitive task performance.
