## **It's the Method that Counts: Using Case Studies and Problem Based Learning to Teach Science and other Disciplines**

### **Project Toolkit**

It is with gratitude to KNAE funding that we present our final report and toolkit. Please find enclosed our final report entitled "It's the method that counts: using case studies to teach science and other disciplines.

The toolkit includes workshop videos and an overview of the videos.

These and other resources on using case studies are also posted on the Laurentian University School of Education website:

[http://www.laurentian.ca/Laurentian/Home/Departments/School+of+Education+English/Research/CS\\_and\\_PBL\\_Post-Workshop.htm?Laurentian\\_Lang=en-CA](http://www.laurentian.ca/Laurentian/Home/Departments/School+of+Education+English/Research/CS_and_PBL_Post-Workshop.htm?Laurentian_Lang=en-CA)

### **Toolkit dissemination**

The toolkit for this project will be disseminated both electronically and manually. Hard copies of the DVDs and video summaries were mailed to all the School boards in Northern Ontario. Copies of the DVDs were also sent to university and college faculty members who attended the workshop. The school boards and all workshop participants have also been provided with the link to the KNAER project resources on the Laurentian University School of Education website and they were encouraged to link these resources to their school board and university websites.

**Funded by the Ministry of Education**
